THIS APPEAL FOR HELP IS FOR YOU

You'll never miss the money—You can spare it;

The children lack your plenty—Let them share it.

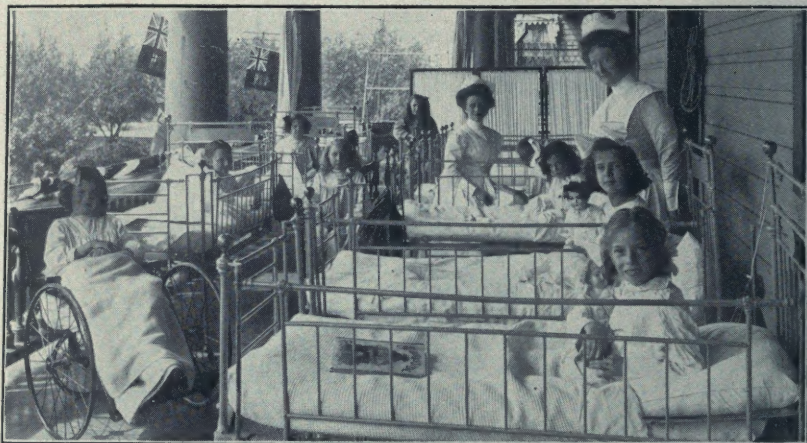

The Hospital can only Help the Little Children as Your
Pocket Helps the Hospital

Remember that every Sick Child in Ontario whose parents cannot
afford to pay is Treated Free.

Please send your Donation to J. Ross Robertson, Chairman of the Board,
or to Douglas Davidson, Sec.-Treas., College St., Toronto.

**SPECIAL TO READERS—Please note this report is perforated, so that leaves
can be separated and distributed to Public and Sabbath School Children.**

Your money is the current that keeps the electric lamps of The Hospital's mercy bright and shining through the darkness of some child's suffering, through the night of some mother's sorrow.

On a Balcony at The Lakeside Home.

One of the great balconies of the Girls' Surgical Ward, with little ones in their cots. They sleep in the open—May till October. Fresh air does wonders for the patients, who prefer to sleep in the open, rather than in the wards.

Interesting Faces from the Wards.

The photo man has a lively time when he enters a ward with his camera. The up-patients gather round him, and appeal to be taken, and the bed patients make a vigorous effort to catch his ear. In the end they nearly all succeed, and so we have an interesting group for this report.

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

Help the Hospital with your Money so that the
Hospital may help the Children with its Mercy.

THE HOSPITAL FOR SICK CHILDREN

Another Chapter in Its Work of Mercy

THE THIRTY-FOURTH IN ITS RECORD.

The making of books is never ending—books, books, books. Readers are many and tastes are varied. The literary palate has to be catered to by writers just as the physical palate has to be watched by the chef “who rules the roast” in the kitchen.

All the resources of authorcraft have to be called into play. The demands of the reading public have to be satisfied. Everybody wants reading matter. The millions are content with the literature that finds its way into cold type in the newspapers. The hundreds of thousands are satisfied with the contents of novelettes, or storiettes, and of magazines of the lower class in the line of fiction. The tens of thousands read the better class of literature in book and magazine form, while the thousands prefer books that can be opened with expectation and closed with profit—books that charm, that entertain and inform—the literature that appeals to the educated mind.

The shelves of our book shops, the cases in our libraries, public and private, year after year gain an increment of literature in book and pamphlet form that opens avenues of glory, or perhaps of misery, for the men and women who hanker for a place in the authors' roster.

Yes, there are ready writers always willing to make books so as to fill the demands of the larger section, a yearning public that shows a decided preference for the class of literature that relates to facts, say history in story form, or for fiction in its better, in its higher vein.

But a halt has to be called when the eye travels along the book shelf that is supposed to contain literature that relates to hospital work, not formal or general descriptive, but the work performed by the men and women, who within the four walls of A Great Mercy, are on the fighting line every minute of the day and night, all the year round.

No, the eye cannot catch a title that even suggests the subject of hospital work. Perhaps some day, someone, man or woman, woman preferably, will write up the story of the daily work in all the departments of a great hospital, first in newspaper form for the general public, and then in book form as a work of reference.

Such a write-up would be full of interest, for it would tell the story of the daily life work of the directing minds that wrestle with the problems which have to be solved in providing for everything that the physician, the surgeon or the nurse may require to conserve the lives of the stricken ones, in adult or infant life, who linger in the beds and cots under their care.

THE ANNUAL REVIEW.

It is, therefore, a necessity that hospital literature should be made interesting in its written, and attractive in its printed form, and so with this view in mind the Trustees present another chapter in the story of the hospital life and work—the thirty-fourth in the book of record—for thirty-five years ago, over the third of a century, the Hospital for Sick Children in its first building on Avenue street, opened the Gates of its Mercy to the sick little ones of the Province of Ontario.

This annual review, or rather story, of the work of the Hospital during the year ending 30th September, 1909, has been written so that the ten thousand donors who have so generously contributed to the carrying on of the institution, as well as other readers, may know not only how our funds have been expended, but have some idea of the results attained in caring for the sick little ones whom we are trying to serve.

The Hospital for Sick Children stands in the front rank as a great

House of Mercy, where little ones receive lodging and maintenance, with the ever watchful care of the skilled nurse and trained physician, and the written and the spoken words we have from thousands of our donors from all parts of the Province, are testimony that our work is appreciated.

THE THIRTY-FOUR YEARS' WORK—1875-1909.

Since the organization of the Hospital, thirty-four years and seven months ago, 15,613 children have been treated in the Institution as In-Patients, and 90,025 have received treatment in the Out-Patient Department.

Of the In-Patients admitted, 11,284 were from the City of Toronto, and 4,329 from other parts of the Province; of these In-Patients, 8,045, or 51½ per cent., were cured; 4,679, or 30 per cent., were improved; 1,238, or 8½ per cent., were unimproved; and 1,118, or 7 per cent., died.

The Hospital has kept pace with the rapid growth of the city. Through the past years we have gradually gained the confidence of the poorer classes by the satisfactory results obtained while their little ones have been with us.

THE PAST TWELVE MONTHS' WORK.

During the past twelve months, from the 1st October, 1908, to the 30th September, 1909, there were 1,155 children admitted as In-Patients, of whom 629 were boys and 526 girls; a decrease of 90 as compared with 1908.

The decrease in the number of patients is accounted for:—

1. By the fact that operations for the removal of tonsils are now performed in our Out-Patient Department, and that last year there were 153 cases so treated, which, had it not been for the change, would have been In-Patients.

2. By the work of the District Nurse, who looks after many babies in their own homes, patients that were heretofore In-Patients.

3. The decrease in the number of In-Patients is also partly due to the epidemic of measles and of scarlet fever, troubles that prevail in all hospitals for children. There were 75 cases of measles and 50 of scarlet fever, which caused a closing at times of the wards of the Hospital. If the wards had not been so closed, the increase in number of Patients would have been at least 200 over the total of last year.

The daily average number of Patients treated in the wards was 135. The previous year the average was 140.

The largest number of Hospital Patients treated on any one day was 160; the smallest number, 100.

In the Out-Patient Department, or Free Dispensary, 10,797 cases were treated, an increase of 134 over 1908.

The public must not imagine that dull routine characterizes hospital life. We often wish that not only our donors, but the public generally, could visit the Hospital, for seeing our cases is so different to hearing about them. It was, we read, "When Jesus saw the multitude" that He had compassion on them.

RESULTS OF TREATMENT, 1909.

Of the 1,155 cases admitted, 508 or 44 per cent. were discharged cured; 260 or 22½ per cent. improved; 90 or 8 per cent. unimproved; 168 or 14½ per cent. died; and 129 or 11 per cent. remained in the Hospital.

The large mortality, 14½ per cent., is slightly larger than the previous year, owing chiefly to two causes—the greater number of infants admitted and the larger number of severe intestinal and malnutrition cases.

Of the 168 deaths during the year, 88 were boys and 80 were girls; 7 died within two hours of admission; 23 within eight hours of admission; 49 within seven days; 40 within two weeks; and 27 within one month; so that 87 per cent. of the 168 were practically beyond hope when admitted.

The Infant Ward, opened in 1906, is managed with great care and along modern and scientific lines. It is worthy of note that over 69 per cent. of the children treated last year were under seven, and 27½ per cent. were under two years of age.

Of the 10,797 Out-Patients, the final results are not reported by parents

at the Out-Patient Department. The staff claims that 8,637 or 80 per cent. were cured, and 10 per cent. improved. A large percentage of surgical cases discharged as "improved" return to the Out-Patient Department for treatment, and are ultimately cured.

THE HOSPITAL NOT LOCAL, BUT PROVINCIAL.

The list of localities shows that the Hospital is not a local or Toronto charity, but absolutely provincial.

Outside the city 383 patients were admitted from 267 places in Ontario this year. Last year there were 368 patients admitted from 241 places in the province, or an increase of 26 in places and 15 in number. Since 1898 the number of places and patients has doubled. This is most satisfactory.

AGES AND SEX OF PATIENTS.

Of the 1,155 patients admitted, there were 629 boys and 526 girls. In 1908 there were 698 boys and 547 girls. Patients are admitted from birth up to fourteen years.

Of the 1,155 there were 229 under one year, 90 between one and two, 95 between two and three, 88 between three and four, 79 between four and five, 68 between five and six, 76 between six and seven, 73 between seven and eight, 56 between eight and nine, 47 between nine and ten, 64 between ten and eleven, 58 between eleven and twelve, 43 between twelve and thirteen, 41 between thirteen and fourteen, 48 between fourteen and fifteen years.

DAYS' STAY IN HOSPITAL OF EACH PATIENT.

The average days' stay of each patient for the year 1909 was 42. Last year the average was 41. The number of days of Hospital care for 1909 was 48,355. Last year the number of days was 51,252.

The above average, 42, is arrived at by dividing the total number of In-Patients, 1,155, into the 48,355, the total number of days of all patients.

COST PER PATIENT PER DAY.

The total number of In-Patients, 1909, was 1,155, who were in 48,355 days, an average of 42 days each. The cost of each patient per day last year was \$1.63 $\frac{1}{4}$, or \$68.56 for the 42 days' stay of each patient. The cost in 1908 was \$1.37 $\frac{1}{4}$, or \$56.27 for the 41 days' stay of each patient. In 1909 there were 1,155 patients in the Hospital for 48,355 days, at a cost of \$78,981.50.

The cost per patient per day is arrived at by adding all the days that each patient has been in Hospital from Oct. 1st, 1908, until Sept. 30th, 1909—the official year—and then dividing the days into the total expenditure.

This is an important paragraph in this report, for it shows that the per capita cost of each patient was \$1.63 $\frac{1}{4}$ for 42 days' stay, as against \$1.37 $\frac{1}{4}$ in 1908 for 41 days' stay.

The cause for this advance in the per capita rate is in part by reason of the outbreak of measles and scarlet fever, for there were 75 cases of the former and 50 cases of the latter.

This outbreak was the cause of lowering the total days' stay by about 7,000. The days' stay was 2,897 less than in 1908. If the Hospital wards had not been closed during the year there would have been an additional 100 patients over last year, which, approximately, would mean 4,000 additional days, or a total days' stay of 55,250. This condition, with the increased cost of food and other supplies, therefore sent the per capita up from \$1.37 $\frac{1}{4}$ to \$1.63 $\frac{1}{4}$, or an addition of 26 cents per head per day in the cost of maintenance. But for this outbreak the per capita would have been about \$1.40.

It is most important to note the free service rendered. Of 1,155 patients admitted, 65 per cent. received treatment free, or 31,439 of the total number of days' service has been given to free patients.

SURGICAL OPERATIONS IN 1909.

The number of operations last year was 588, being a decrease of 87 as compared with 1908. In 1909, of the 588 operations, 21 did not recover. The total number of surgical cases treated was 538; 43 less than last year.

THE OUT-PATIENT DEPARTMENT.

The total attendance at the Out-Patient or Free Dispensary was 10,797, an increase of 134 over 1908.

Of the above number, 2,674 were new patients. There were 5,938 boys and 4,859 girls. The average attendance for the year was over 35 per day.

Of the 10,797 patients treated, there were 730 eye, ear, nose and throat cases; 531 orthopedic, and 9,536 general.

The cases at the Outdoor Department were doubled in five years. In 1905 they were 4,848; in 1909, 10,797; an increase of 5,949.

THE FREE DISPENSARY.

The work at the Dispensary has shown that 29,725 prescriptions were filled, which includes daily solutions, ward requisites, dressings and chemicals.

The cost of the Dispensary was \$1,000 over that of 1908. The Superintendent accounts for the increase by the fact that many cases demanded a greater increase in the surgical dressings, and the greater number of cases, especially tonsil cases, requiring anaesthetics.

THE ORTHOPEDIC DEPARTMENT.

There is no branch of the Hospital work where better results have been secured than that under the charge of the orthopedic surgeons.

The cases treated include spinal troubles, hip joint, club feet, bow legs, knock-knees and other deformities.

The orthopedic surgeon, besides attending In-Patients, also attends at the Out-Patient Department to examine and treat patients, to give instruction to students in the diagnosis and treatment of various deformities, and to demonstrate the use of orthopedic appliances.

MASSAGE.

Of the 1,155 patients admitted to the Hospital in 1909, 360 were treated, some almost daily, and the total number of treatments were 7,570. The usefulness of massage treatment is increasing every year, and it is now extending into every special and general branch of medicine. Mrs. Griswold, the masseuse, is an expert in her work—one of the best in the Dominion—and the results of massage under her treatment have been highly satisfactory.

THE GYMNASIUM.

The Gymnasium has been equipped with up-to-date appliances. During the year corrective gymnastic treatments were given: For Hospital patients, 438; Out-Patients, 167; private patients, 589. There is no "class" work for patients—everyone receives individual treatment from thirty minutes to one hour.

X-RAY AND PHOTOGRAPHY.

The X-Ray and Photographic Department still proves a great adjunct in Hospital work, and is solving many of the problems of the practitioner. In 1909 465 photographs were taken, 890 sciagraphs made, 70 treatments given, and 25 cases of fracture reduced with good results.

Besides the above, many lectures and demonstrations have been given throughout the year with illustrations of the subjects presented. For tracing disease, locating injuries by missiles, the work of the X-Ray is plainly evident, even to the eye of the casual observer.

Some of the cases in which doubtful diagnosis was assisted, and others confirmed by sciagraphs last year, were: A sprained wrist, abscess on foot, sprained ankle, tuberculosis of the right lung, fracture of femur, stones in kidney, foreign body in thumb, disease of the spine, deformity of foot.

THE LAKESIDE HOME.

The Lakeside Home for Little Children, at the Lighthouse Point, Toronto Island, was opened from May 26th to Sept. 30th.

During these months 320 patients were treated, which brings the number up to 4,570 since 1882, when The Lakeside was opened.

The patients at The Lakeside sleep in cots and beds placed on the broad open balconies of the Home. The good results of sleeping in the open air are wonderful. For four months last summer, an average of a hundred patients slept in the eight open balconies connected with the wards of the Home.

THE SCHOOL-ROOM.

The work in the School-room has progressed very satisfactorily. The School was started in 1892. Last year 126 children attended, a daily average of 30.

THE TRAINING SCHOOL FOR NURSES.

The Training School for Nurses maintains the high standard aimed at; 285 applications were received in 1909, of which 50 were accepted.

During the year 12 pupils entered the School and 17 nurses graduated, making a total of 204 graduates in the twenty-four years of the existence of the School. There are now in training 61 nurses, of whom 6 are head nurses, 19 senior, 9 intermediate, 12 junior, and 15 probationers.

The following lectures were given:—28 lectures for juniors and 29 lectures for seniors by physicians and surgeons or by the medical and surgical staff; two lectures weekly by the superintendent and her assistant; one lesson daily by masseuse; also special and individual instruction was given in sterilizing, operating-room technique, and the preparation of infants' food.

In the probationary course the following lectures were given:—Two lectures a week by a special lecturer; daily classes and demonstrations by the teacher of probationers; daily gymnasium classes by a special teacher, and daily lessons in the Diet Kitchen by the dietitian.

THE RESIDENCE FOR THE NURSES.

The Residence, first occupied in Oct., 1906, has in every way provided the best of conditions necessary to good health and personal hygiene, with surroundings that are most homelike.

Donald J. Mackintosh, M.B., M.V.O., Medical Superintendent of the Western Infirmary in Glasgow, Scotland, in his recent work on Hospital Construction, Equipment and Management, says of the Residence: "This is probably the best equipped Nurses' Residence attached to any Hospital." Dr. Mackintosh is regarded as the highest authority in the British Empire on hospital construction and equipment. He visited Canada and the United States in 1908. The Residence, with its equipment, was a gift to the Hospital.

THE VISITING OR DISTRICT NURSE.

On the 2nd of Dec., 1908, the District Nurse was installed, and the record up to the 30th of Sept. shows 350 patients visited, or 1,800 visits made.

The work of the District Nurse is to follow up the cases discharged from the Hospital, and from the Out-Patient Department.

The nurse brings into the squalid homes of the poor an educative and refining presence; teaches, by acts and suggestions, the laws of health and hygiene; puts heart into the mothers, and brightens the lives of the children.

By the appointment of a Visiting Nurse we are endeavoring to answer the question constantly asked: "What are you going to do with the poor children who come to the Out-Patient Department of our city hospitals?"

We are seeking to improve the condition of the home, to compel intelligent action on the part of the mother, and to save the city from the diseased, the helpless, and the cripples of the future.

PASTEURIZATION PLANT.

Parents, physicians and philanthropists have for years been face to face with the problem of infant mortality. In a large city there can always be found districts that are filled with weak and puny children; children who have not had half a chance, who begin life improperly nourished, underfed because of poverty, or overfed because of the ignorance and carelessness of mothers or attendant neighbors.

The poor mothers of small babies always look forward to the summer

with dread. They fear not only the effect of the heat on the child, but the danger lurking in the milk supply.

The Hospital has been presented by J. Ross Robertson with a fully equipped plant to provide pasteurized milk for the babies in the In- and Out-Patient Departments, with the object of reducing the infantile death rate. In the installation Mr. Robertson consulted Mr. Nathan Straus, to whose generosity the people of New York and other cities of the United States owe so much for the great work done by pasteurization.

NEW COTS DURING THE YEAR.

The following cots have been named in perpetuity in the Hospital in College street in 1909 :—"The Alexander Manning Cot," by bequest of the late Mr. Alexander Manning, Toronto ; "The Tommie Cot," by Mrs. T. G. Blackstock, Toronto. The following cot was named to be maintained annually in the Hospital in College street :—"Employes T. & N. O. Railway," by "The Motive Power and Car Department, T. & N. O. Railway, North Bay." The following cot was named in perpetuity in The Lakeside Home, Toronto Island :—"The Mikado Cot," by Mr. Kenji Ishikawa, Yokohama, Japan. The following cots were named to be maintained annually at The Lakeside Home, Toronto Island :—"Western Methodist S. S. Cot, Napanee," by the Western Methodist Sunday School, Napanee ; "St. David's Methodist S. S. Cot," by St. David's Methodist Sunday School ; "Downsview S. S. Cot," by Downsview Sunday School ; "The I. A. A. Cot," by the Island Aquatic Association.

BEQUESTS FOR THE YEAR.

The Trustees beg to acknowledge with thanks the following bequests :—Estate of F. L. Beck, South Cayuga, \$60 ; estate of H. James, Brantford, \$250 ; estate of J. Allan Law, Niagara Falls South, \$50 ; estate of G. W. Lewis, Toronto, \$475 ; estate of R. J. Doyle, Owen Sound, \$10 ; estate of William Warren, Montreal, \$270 ; estate of G. W. Burrows, Conn, \$100 ; estate of Mary S. Williams, Toronto, \$50 ; estate of Alex. Robertson, Toronto, \$100 ; estate of Catherine McDonald, Aurora, \$336.25 ; estate of Thomas Hall, Uxbridge, \$3,997 ; estate of Henry Goulding, Toronto, \$5.40 ; estate of Mary Allbright, South Cayuga, \$92.87 ; estate of Mrs. G. Cumming, West Montrose, \$10 ; estate of Thos. F. Wallace, Woodbridge, \$100 ; estate of Richard Gregory, Kingsville, \$3,762.58 ; estate of Rev. R. O. Crossley, Whitby, \$100 ; estate of A. H. St. Germain, Toronto, \$200 ; estate of Joseph Young, Walkerton, \$650 ; estate of H. C. Hammond, Toronto, \$2,500 ; estate of Wm. Kingsley, Toronto, \$1,000.

RECEIPTS AND EXPENDITURE.

The receipts on maintenance account were \$74,081.39, while the expenditure on the same account was \$78,981.50. The expenditure shows an increase of \$8,640.52, due mainly to necessary expenses—the insurance premiums (\$1,460) falling due this year, the installation of an up-to-date sterilizer for the operating-room (\$800), the increased cost of staple articles in food \$1,200, and in the dispensary of \$1,000, and ordinary repairs \$1,584, increase in wages \$1,000, and incidentals of \$1,600. All these increases were unavoidable.

The charges on capital account have also been very heavy. The general furnishings this year amounted to \$5,132, the permanent repairs to the Hospital in College st., which included a fire escape, new floors in part of the building, repairs in heating plant, all cost \$2,244 ; The Lakeside Home isolation building, with its furnishings ; new water mains for fire protection, and permanent repairs to The Lakeside Home cost \$3,500. Then the discharge of a mortgage of \$6,250 on property in Hayter and Elizabeth street, property that the Trust were compelled to buy to prevent the land adjacent to the Residence from being used as a factory, was a charge that could not be avoided.

The change in The Lakeside laundry work, which is now done in College street, instead of at The Lakeside, enabled the Trustees to turn the laundry at The Lakeside into an isolation building capable of holding from 40 to 50 patients. The cost was about \$2,000. It was not only a necessary but a wise expenditure, for from the beginning of June to the end of August it

was full of our little ones down with measles and scarlet fever. If this building had not been provided, The Lakeside Home would have had to be closed for admission of patients; that is, instead of having 320 patients in the four months, the number would have been reduced to about one hundred. Miss Brent, the Superintendent, states that if this isolation building had not been fitted up, it would have cost the \$2,000 that was expended on alterations.

A WORD ABOUT THE STAFF.

The staff of the Hospital has been most faithful in the discharge of its duties. All the physicians and surgeons have taken an active interest in their ward work. The Superintendent, Miss Brent, has exercised wisdom, tact and good judgment in the general management of the institution, while her assistant, Miss Potts, has ably seconded her efforts. To the teacher of probationers, Miss Kinder, a great deal of the success of the Training School is due. The Diet Kitchen course of training is perfect under the care of Mrs. MacBeth, the Dietitian. Miss Andrews, the Housekeeper, is a most satisfactory official. She has displayed exceptional ability in the management of her department. The business department has been well administered by Mr. Douglas Davidson, the Secretary-Treasurer, and his assistant, Miss Elizabeth Kerr.

OUR APPEAL FOR 1909.

The Hospital is not a Corporation for Profit, but a Home of Mercy. It stands open day and night, ready to meet the emergency of disease or accident. It is **better** than the Good Samaritan, "Who came by chance that way." The Hospital, with its vine of strength and oil of healing, is already here against the time of need.

"LEST WE FORGET"—REMEMBER THAT:—

Your money is a blessing to the child it helps, and the thought that you have helped a child is a blessing to you.

If you could see the little heads pillowed in the cots of the Hospital's kindness, you would give money quicker than the Hospital can ask it.

Your dollars are the bone and sinew of the Great Arms of the Hospital's mercy.

The Hospital can only help the little children as your pocketbook helps the Hospital.

Your dollar can be nurse, doctor, healing and health to the little ones as dear to fathers and mothers as your child is to you.

The child of your neighbor may want your name on the credit side of the Great Ledger of the Hospital's mercy.

The day of miracles is past, but you can do something towards making this a day of mercy.

The Hospital is not a local but a great Provincial Charity that the sick child of the poor man in any part of Ontario has the same claim upon its help as the child who lives within the shadow of its walls in Toronto.

And, finally, remember that money is more than water to the little prisoners of pain, and the blessing upon him "Who giveth a cup of cold water" is not denied to you.

FOR THE TRUST,

J. Ross Robertson

CHAIRMAN

E. B. OSLER,

CHARLES COCKSHUTT,
J. ROSS ROBERTSON,

Trustees.

GIVE Your Money and Help the Hospital
to Kindle a Dawn of Health and Happi-
ness on the Horizon of Some Little Life :: ::

Some Snapshots of Hospital Life.

A SWEET PICTURE

The little one says: "Nurse, I'll send this to mother," and the nurse wrote the letter in just the exact words the little one dictated. This photo is considered the prize one of the year.

THE PRIZE TABLE

On Dominion Day all Up-Patients at Lakeside have a picnic on the lawn with a dozen tables. The three best decorated get prizes. This table won the first, to the delight of the youngsters.

A GROUP OF FIVE

"Delight" is no word for the pleasure it gives the little patients when they are told that the "picture man" is going to "take" them. For being "quiet for fifteen seconds" they each get a picture.

A HAPPY SCENE IN THE GIRLS' SURGICAL

"A Truthful Page is Childhood's Loving Face"—and here are seven little blossoms of humanity—all of whom went to their homes in perfect health.

CHEER SOME MOTHER'S HEART BY SAVING SOME
MOTHER'S CHILD

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College St., Toronto.

AUDITOR'S REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust—Dear Sir,—I beg to certify that the Receipts and Disbursements of the Hospital for Sick Children have been carefully audited with the vouchers and bank account throughout the year ending Sept. 30, 1909, and the accompanying statements of Income and Expenditure and of Assets and Liabilities bearing my signature are a true and correct account of the affairs of the Hospital to that date. The books and work of the office are well looked after, and all desired information has been freely given. Respectfully submitted,

Toronto, Oct. 9, 1909.

A. C. NEFF, F.C.A., Auditor.

TO OUR FRIENDS WHO HELP US.

The number of individual subscriptions have so increased that to print and publish them, and to pay postage would involve an expenditure of about \$1,000, so that the Board have accepted the offer of The Evening Telegram to print the names of the donors, free of charge, after which a copy of the sheets containing the names will be sent by the Trust to the individual donor. This is in addition to the post card acknowledgment made on receipt of donation, by the Secretary-Treasurer of the Hospital.

**The Little Ones, the Little Ones,
Their Pain Cries Out to You,
Your Money Swift its Errand Runs,
Each Day the Need is New.**

So Happy in the Clover Field.

The children love the fragrance of clover—we admire ornaments set in diamonds and other precious stones—but is there any prettier setting on earth than this picture of the idols of our hearts and the treasures of our households in the clover field of The Lakeside Home.

Sand, Sand, Nothing but Sand.

In front of The Lakeside Home—on the west shore of Toronto Island there are acres and acres of sand—for the Island is just made of washings from the lake, a great spit of sand—Building castles in the sand gives untold pleasure to the convalescents, so on the bright summer days the up-patients have an outing under the charge of a nurse.

\$\$\$ ARE THE GREAT ARMS OF THE HOSPITAL'S MERCY.

COTS NAMED AND MAINTAINED IN PERPETUITY IN THE HOSPITAL FOR SICK CHILDREN.

This record of especially the last nineteen years shows that the objection parents have had to sending their sick little ones to the Hospital has been largely overcome.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec. Treas., College Street, Toronto,

THE GRATITUDE OF A CHILD IS A JEWEL OF GREAT WORTH

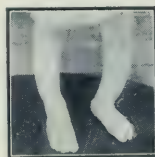

See What the Skill of the Surgeon Does
for Children Born with Deformities

BEFORE

BEFORE

BEFORE

BEFORE

Remember that every crippled child in Ontario, whose parents can't afford to pay—is treated free in the Hospital for Sick Children.

These are photos of the feet of children of poor people—mechanics and working men — whom the Hospital has helped.

Just think of it—Your money can help the Hospital to do the good work of straightening the crooked limbs and club feet of little children.

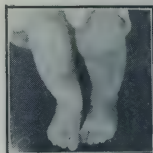

Do you realize that these crippled children whose feet you see, are now able to walk about just as if they never had a deformity.

There Were 69 Cases
In the Hospital
Last Year, and

67 Had Perfect Correction

—AND—

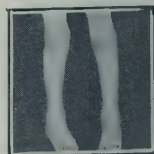

16 Cases of Bow Legs
—all were Straightened

CAN YOU HELP US
WITH A DOLLAR ?

YOU'LL BE A DOLLAR
HAPPIER IF YOU DO.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec-Treas., College Street, Toronto.

**Money is Music and the Dollars of the
Merciful are a Song of Angels in
the Ear of Suffering Childhood**

Up-Patients in the Boys' Surgical Ward.

Here they are—ten of them. They are so good, so quiet when they face the camera—but sometimes, especially when they are on the high road to convalescence—some of the youngsters do try the patience and temper of the nurses—But all round they're a lovely lot of lads.

Three Nations Represented.

From the left as you look at the photo, the first has club feet, she's British—the second little one has bow legs, and she is Greek, while the third, also with bow legs, is Italian—and they are a bright trio and will shortly leave the Hospital with perfect correction.

WILL YOU HELP US WITH YOUR DOLLAR

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

What the X-Ray Has Done for Humanity !

SEE THE BREAK

BEFORE SETTING OF ARM.

THE WONDERS ACCOMPLISHED BY THE X-RAY

These are just a few
of the Cases :

This shows the arm before and after setting. The break is marked by X. The result was perfect.

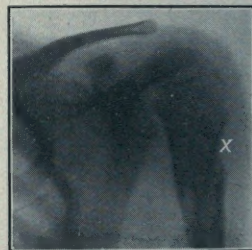

This coin in stomach was located. It passed naturally three weeks after the child swallowed it. The body had to be X-rayed frequently to see if the position of the coin was dangerous to the patient.

The crushed elbow is that of a little boy who fell on the deck of a steamship on the Atlantic, and so dislocated the elbow. The result was perfect.

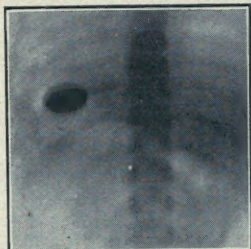

In the case of the broken leg the limb was fastened together by screws and plates, and the result was perfect.

The short piece shows what was left of the diseased bone in the arm. The diseased part was removed, the arm watched to see that no further bone trouble occurred and the child has now a useful arm.

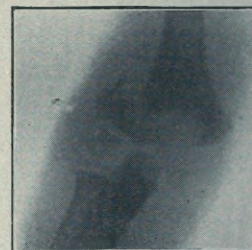

NOTE THE JOIN

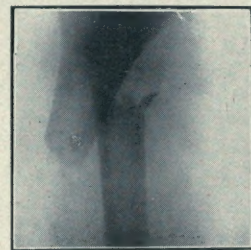

AFTER SETTING OF ARM.

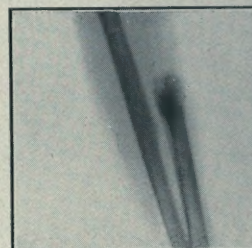

COIN IN STOMACH.

A CRUSHED ELBOW.

BROKEN LEG.

DISEASED ARM—SHORT BONE.

The Hospital entreats you to take \$ \$ \$ \$ out of your pocket, and
put health into the lives of little children, and hope into
the hearts of their mothers.

Cases of Harelip == Perfect Results

BEFORE

A GREAT RECORD

There were 18 cases of Harelip in the Hospital last year and 17 cases had perfect results.

Every sick and crippled and deformed child in the Province has a claim upon the mercy of the Hospital, and the Hospital has a claim on every man, woman and child in Ontario.

AFTER

So Perfect that Mothers hardly Recognize their own Children

BEFORE

The photos are better than a page of words in showing what magnificent results are obtained in three cases treated.

Will you help us in our work? Your dollar will be a gift that will earn dividends—a dollar sent direct on an errand of mercy. One mother said to a surgeon: "Faith, doctor, you've made my kid into a beauty—she'll marry a millionaire."

AFTER

Will You Help on This Great Work with Your Dollar?

BEFORE

All these patients were the children of mechanics and all classes of working people, who could not afford to pay for the treatment. So you see what the Hospital does for the afflicted children of poor parents of the Province of Ontario. Every dollar helps.

The Hospital is the Door to Health and the Door to Home. Through its portals pass the never-ending line of little ones with deformities corrected by the Hospital's healing hand.

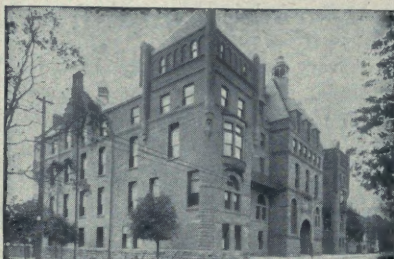

AFTER

Please Remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

Oh, let your money be a good Samaritan to some child who has fallen among thieves—infirmity and disease—that are robbing a limb of its straightness or a life of its hope.

THE ANNUAL REVIEW FOR 1909

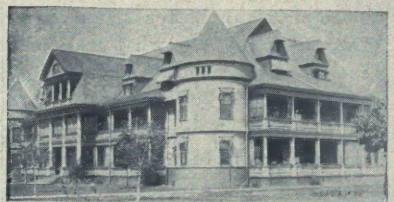

The Hospital Changes Discords of Disease and Death into Harmonies of Hope and Health and Does it with Your Money.

THE HOSPITAL IN COLLEGE STREET, TORONTO

This is the great red pile on College Street, in which were treated and nursed 1,155 in-patients last year, 383 of whom came from outside, and 772 from inside of Toronto.

Make your \$ \$ \$ shine as Stars of Hope in the sorrow-darkened skies of some child's life.

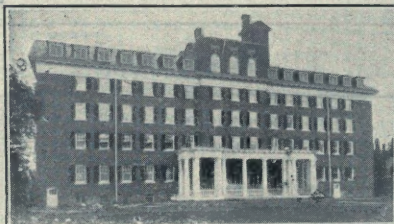

THE LAKESIDE HOME FOR LITTLE CHILDREN

This is the Summer Sanitarium of the Hospital on Toronto Island, where 320 patients were nursed last summer. You see large balconies in photo—well, 100 of our little ones sleep on these every night for four months, May-Oct. There is no Sanitarium for children like ours in the world.

Smiles for Sorrow—That's what your Money enables the Hospital to do—exchange Smiles for Sorrow.

A PROBATIONER

THE NURSES' RESIDENCE, HOSPITAL GROUNDS

A GRADUATE NURSE

The Nurses' Residence, where the Superintendent, staff, sixty-one nurses and twenty-one domestics live. The residence is up-to-date in equipment, with lecture, demonstration and study rooms. The medical library contains every book in English language on nursing. Every nurse has a separate room, well ventilated and comfortably furnished. There are parlors on each floor, and reception, music and writing rooms. The diet kitchen is in the building, also gymnasium and swimming pool. Perfect sanitation and good food are characteristics of the residence. The Residence was a gift to the Hospital.

"A Heart that Never Hardens, a Hand that Never Tires, a Touch that Never Hurts," that's what the Hospital for Sick Children has proved itself to be in the experience of many a suffering child and sorrowing mother.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.
